VERSIONAMENTO DE SOFTWARE

The image shows a screenshot of a GitHub profile for José Valim. The profile includes a profile picture of José Valim speaking at a podium, his name 'José Valim' and username 'josevalim', and his affiliation with 'Plataformatec' in Kraków, Poland. It also lists his email, blog, and join date (7 May 2008). Statistics show 5.4k followers, 221 starred repositories, and 24 following. A section for 'Organizations' lists Rails, Plataformatec, and others. The main content area shows 'Popular repositories' with a list of projects like 'inherited_resources', 'rails-footnotes', 'enginex', 'easy_http_cache', and 'xgen'. Below this is a 'Contribution activity' heatmap for the last year, showing 3,247 contributions. The heatmap is a grid where columns represent months from August to July, and rows represent days of the week (M, W, F). The color of each square indicates the number of contributions, with a legend at the bottom right showing a gradient from light green (Less) to dark green (More). A dropdown menu at the bottom right of the heatmap is set to 'Period: 1 week'.
